# LET'S START!

Every day, all over the world, baby animals are born. Some are small, some are big. They are all amazing! Welcome to the world, babies!

Look at these baby animals. What animals are they? Do they look like their mothers or like their fathers? Do they drink milk to grow?

Now, learn all about some more babies!

# 1

## GETTING READY

It's time to have babies!  
Different animals do  
different things.

**Polar bears** make a den  
in the ice. It's nice and  
warm in there!

**Spiders** make a sac for  
their babies. They put  
the sac on their web.  
Then, they go away.  
Mother spiders don't  
see their babies again.
